Subj: Lake Jordan rules

Dear Rich,

I am very excited that the lake is getting some attention and new rules are being established. I have been a Chatham County resident for almost two decades and Wake County before that.

I really believe that we need to take big steps, be progressive and get all motorized vehicles off the lake. Other places are doing this to ensure clean, safe water. The sailboats, kayaks, canoes and swimmers would love it. And of course, the life in the lake as well as the people drinking the water would be ecstatic. This would be a great step of leadership and others would follow.

Best Regards,
